Subject: Confidential - Drilling Activities Update - EPA ID IND 044 587 848

Carolyn,

Drilling activities were completed in Hamilton Avenue and the northern end of Forsythe Street yesterday (9 borings completed). Today, we are progressing down the western side of Forsythe Street. It sounds like IDEM may be out this afternoon and tomorrow to observe drilling activities. No NAPL has been detected.

As an FYI – We believe that EWA may be completing sampling events at Ex. 6 Personal Privacy (PP) this week. There may be other homes as well, but these are homes we have sampled and contacted the property owners about conducting a winter re-sampling and they stated the EWA would be in there this week.

Additionally, a news crew was at the entrance to Glendale Drive yesterday and a Franklin College student also took some pictures of drilling activities (for a research paper). Today, EWA, Mundell, and a news crew were Ex. 6 Personal Privacy (PP) and some/all have been there most of the day so far. It appeared that the news crew took some footage of our drilling activities while they were on-site.

Thanks,
Chris
